|                     | Self-study         20h         18h         20h   |                       |            |         |           |           |          | 20h        |          |       |
|                     |  |                       |            |         |           |           |          |            |          |       |
|                     | A project builds the core of the module. The mission is to develop and manage a product or |                       |            |         |           |           |          |            |          |       |
|                     | a service.   |                       |            |         |           |           |          |            |          |       |
|                     |  |                       |            |         |           |           |          |            |          |       |

|                  | During the central teaching lessons, techniques, methods, and concepts are presented and discussed. Additional material for self-study will be provided to build a deeper understanding of the topics.   |  |  |  |
|------------------|--|--|--|--|
|                  | In line with the topics covered in the central lessons, a project is implemented in the decentral lessons. The students work together in small groups. In a first phase, the students will apply innovation techniques to come up with a product/service idea and will compile a business model canvas around the product/service. In the second phase, PM techniques will be applied to plan the development and production of the product. |  |  |  |
|                  | The project consists of milestones. Simulating a peer-reviewed process, each group reviews<br>and discusses the progress of two other groups. The review further strengthens the<br>understanding by offering a different point of view.   |  |  |  |
|                  | The role of the teacher shifts in the decentral lessons from a lecturer to a coach.  |  |  |  |
| Assessment of    | 1. Final online exam, open book (on methodologies) (80%)   |  |  |  |
| learning outcome | <ol> <li>Three group assignments during the module; to be handed in within 2 weeks each<br/>(20%)</li> </ol>   |  |  |  |
| Format           | 7-weeks  |  |  |  |
