

# Master in Life Sciences

A cooperation between  
BFH, FHNW, HES-SO, ZFH

<b>Module title</b>	<b>Drug Formulation and Delivery for Solid Dosage Forms</b>
<b>Code</b>	BP2
<b>Degree Programme</b>	Master of Science in Life Sciences
<b>Group</b>	Bio/Pharma
<b>Workload</b>	3 ECTS (90 student working hours: 42 lessons contact = 32 h; 58 h self-study)
<b>Module Coordinator</b>	<p><b>Name:</b> Dr. Georgios Imanidis  <b>Phone:</b> +41 (0)61 228 56 36  <b>Email:</b> <a href="mailto:georgios.imanidis@fhnw.ch">georgios.imanidis@fhnw.ch</a>  <b>Address:</b> School of Life Sciences - FHNW, Institute of Pharma Technology, Gründenstrasse 40, 4132 Muttenz</p>
<b>Lecturers</b>	<ul style="list-style-type: none"> <li>• Dr. G. Imanidis, School of Life Sciences - FHNW</li> <li>• Dr. M. Kuentz, School of Life Sciences - FHNW</li> <li>• Dr. T. Guentert, Private consultant (ex. Roche), Böckten</li> </ul>
<b>Entry requirements</b>	<p>Bachelor's Degree in Life Sciences (or equivalent) in Pharma Technology, Chemistry, Process Technology, or Food Technology.          Preparation of the topic "basic pharmacokinetics" is essential, including the self-test on Moodle. In addition, study of relevant literature.</p>
<b>Learning outcomes and competences</b>	<p>After completing this module, students:</p> <ul style="list-style-type: none"> <li>• know the formulation strategies for poorly water-soluble active pharmaceutical ingredients,</li> <li>• know formulation concepts of solid dosage forms for per-oral drug delivery,</li> <li>• understand the principles and mechanisms of controlled drug release and delivery,</li> <li>• can evaluate the blood plasma concentration profiles and therapeutic effects of controlled drug delivery based on pharmacokinetic principles,</li> <li>• can develop pharmaceutical dosage forms (after acquiring relevant practical experience),</li> <li>• are able to work in interdisciplinary teams of drug development.</li> </ul>
<b>Module contents</b>	<p><u>Controlled release technologies:</u>          Fundamentals of controlled release and examples thereof; theory of drug diffusion, kinetics, crystals, particles, membrane &amp; matrix systems, hydrogels, lipogels, multi-phasic, swellable, erodable, biodegradable, monolithic/particulate, micro-/nano-particulate, osmotic, stimuli responsive systems, devices, pumps, eluting stents.</p> <p><u>Per-oral drug delivery and formulations of poorly water-soluble drugs:</u>          Intestinal absorption, models, theory of solubility, principles of solubilization, the requirement for the active ingredient and formulation technologies including lipid-based, solid dispersion and particulate systems.</p> <p><u>Biopharmaceutical modeling and simulation:</u>          Basic principles and application of LADME in time-controlled delivery; physiological transport, pharmacokinetic models, compartmental and physiologically based modeling, pharmacokinetic profile for different drug delivery kinetics, data analysis exercises.</p>

# Master in Life Sciences

A cooperation between  
BFH, FHNW, HES-SO, ZFH

<b>Teaching / learning methods</b>	Lecture, theoretical workshop, literature search, computer modelling exercises
<b>Assessment of learning outcome</b>	1. Written final examination, closed book (100%)
<b>Format</b>	7-weeks
<b>Timing of the module</b>	Autumn semester, CW 45-51
<b>Venue</b>	Olten and/or online
<b>Bibliography</b>	D.L. Wise: Handbook of Pharmaceutical Controlled Release Technology M.J. Rathbone, J. Hadgraft, M.S. Roberts, M.E. Lane: Modified-Release Drug Delivery Technology, Volume 1 & 2 M. Grassi et al.: Understanding drug release and absorption mechanisms M. Rowland & T.N. Tozer: Clinical pharmacokinetics - concepts and applications S.A. Peters: Physiologically based pharmacokinetic (PBPK) modeling and simulations - principles, methods, and applications in the pharmaceutical industry
<b>Language</b>	English
<b>Links to other modules</b>	Specialisation module FHNW "Formulation of biologics and routes of drug delivery"
<b>Comments</b>	The homework assignments can be used to round up the grade in the respective part of the exam.
<b>Last Update</b>	31.03.2021
