Module title	Polymers and Applications							
Code	C3							
Degree Programme	Master of Science in Life Sciences							
Group	Chemistry							
Workload	3 ECTS (90 student working hours: 40 lessons contact = 30 h; 60 h self-study)							
Module	Name: Prof. Roger Marti							
Coordinator	Phone: +41 (0)26 429 67 03							
	Email: roger.marti@hefr.ch							
	Address: Haute école d'ingénierie et d'architecture Fribourg, Perolles 80, 1700 Fribourg							
Lecturers	Prof. Olivier Nicolet, HEIA-FR							
	Prof. Roger Marti, HEIA-FR							
	Prof. Hans-Ulrich Siegenthaler, iRAP Institute of Applied Plastics Research, HEIA-FR							
	Prof. Dominik Brühwiler, ZHAW							
	Guest lecturers & experts from industry							
Entry requirements	Chemistry at Bachelor of Science level.							
	Knowledge required in: Organic chemistry (reactivity of carbonyl and carboxylic acid							
	derivatives, radical reactions) & Analytical and physical chemistry (spectroscopy,							
	thermal analysis, chromatographic methods).							
	Preparatory reading will be made available on Moodle.							
	See also information under "comments"							
Learning outcomes	After completing the module, students will be able to:							
and competences	<ul> <li>design and execute typical synthetic methods for the preparation of polymers</li> </ul>							
	select appropriate analytical and physico-chemical methods to analyze and							
	characterize polymers							
	work with inorganic polymers and biopolymers and use them for applications							
	explain polymer processing and industrial application of polymers							
Module contents	Synthesis of polymers (Chain-growth and step-growth polymerization)							
	Chemical Post-Polymerization Modifications							
	Characterization of polymers							
	Biopolymers and "Bio"-Plastics							
	Environmental impact of plastics							
	Inorganic & electronic polymers							
	Polymers processing							
Teaching / learning	Industrial applications							
Teaching / learning methods	Basic concepts and theoretical backgrounds by lecturers      Basic concepts and the backgrounds by lecturers							
inetiious	Inputs by guest lecturers from industry and academia							
	Exercises and analysis of case studies  Leb visite with bonds on demonstration.							
A	Lab visits with hands-on demonstration  A Weither avera (along the all) final (100%)							
Assessment of	1. Written exam (closed book), final (100%)							
learning outcome	Winternahaal							
Format	Winter school							

20.02.2025 -1/2-

Timing of the	Autumn semester, CW6									
module			ı	1	ı	ı	1		1	
	Day of the block week	<1	1	2	3	4	5	>5		
	Contact teaching		8	8	8	8	8			
	(lessons)									
	Self-study (hours)	20	2	2	2	2	2	30		
Venue	Fribourg									
Bibliography	Course based on:									
	Chada & Roy: "Industrial Polymers, Specialty Polymers, and their Applications" CRC Press 2009									
	Carraher: "Introduction to Polymer Chemistry" CRC Press 2011									
	Campbell, Pethrick & White: "Polymer Characterization: physical techniques" CRC Taylor & Francis 2000 Mark, Allcock & West: "Inorganic Polymers" Oxford University Press 2005									
	Iviality, Allicock & West. Illulgatile Polytileis Oxiola Offiversity F1633 2003									
	Lectures notes (PDF) and additional material (exercises) will be delivered in addition during the module.									
Language	English									
Links to other	Coordination with modules C1 "Materials Science", C2 "Surface Characterisation", C4									
modules	"Green Chemistry" and C5 "Chemistry and Energy".									
Comments	There is a participant limit	There is a participant limit in this module. Registrations will be considered as follows:								
	1. Students for whom C3 is a compulsory module									
	2. Students from the Chemistry-Cluster									
	3. Students who need the ECTS for the graduation in the semester concerned									
	4. The remaining places will be drawn by lot									
	7. The remaining places will be drawn by lot									
	Whether participation is possible will be communicated by the end of week 37.
